INDUSTRY BOTTLENECKS • THE ONGOING PAIN

The Silent 5-Day Crisis in Every Insurance Agency

Whether managing 300 or 3,000 policies, agents waste 20+ hours monthly on clerical typing while losing 20–35% in renewal commissions.

The 5-Day Clerical Nightmare

OPERATIONAL BOTTLENECK

- **Unstructured Insurer PDFs:** LIC, Star, & HDFC send multi-page PDF tables with zero format consistency.
- **The Zero-Contact Trap:** Statements list policy dues, but **zero customer phone numbers**.
- **25+ Hours Wasted on Excel:** Staff waste 5–6 days manually retyping data and searching paper diaries.
- **Silent Revenue Bleed:** 20%–35% renewal reminders missed; policies lapse and trail commissions vanish.

The Financial & Operational Toll

ANNUAL REVENUE DRAIN

- **₹1,20,000+ Annual Typist Salary:** Burning ₹10,000/mo just for copy-pasting numbers from PDFs.
- **70% Prime Selling Time Lost:** Top advisors trapped doing clerical data entry instead of meeting HNIs.
- **Zero Unified Family View:** Scattered life, health, and motor records across multiple insurer portals.
- **Missed Grace Deadlines:** Policyholders never receive timely automated vernacular WhatsApp alerts.
