OPERATIONAL & ARCHITECTURAL ANALYSIS

The Hidden ₹20,000/Month Cost of Traditional Renewals

Whether managing 500 or 2,500 active clients, manual Excel typing and delayed outreach silently drain agency profits.

Traditional Agency Bottlenecks

OPERATIONAL FRICTION

- **The 25+ Hour Typing Trap:** Staff waste 20–30 hours/month or spend ₹8,000–₹12,000/mo on operators to manually re-type insurer portal PDFs into spreadsheets.
- **The 'Zero-Contact' Deadlock:** Insurer portal due lists contain policy numbers and overdue amounts, but zero phone numbers or emails — paralyzing immediate outreach.
- **The 1-Hour Broadcast Illusion:** Single-blast SMS or English WhatsApp broadcasts miss 2nd/3rd grace period alerts, suffering an avoidable 20%+ policy lapse rate.
- **Monolingual English Drop-off:** English-only notifications see a 65% lower engagement rate among retail and SME policyholders across Indian regions.

The InsuranceSetu Advantage

AUTOMATED REVENUE CRM

- **1-Click Instant PDF Ingestion:** Drag and drop multi-page portal due lists (LIC, Star Health, Tata AIG, PolicyBazaar); 200+ rows extract in under 5 seconds.
- **2-Tier Indian Phonetic Matcher:** Instantly links policy numbers to your phone contacts using soundex algorithms built specifically for Indian regional names.
- **Multilingual Mother-Tongue Outreach:** 1-click WhatsApp alerts in Gujarati (ગુજરાતી), Hindi (हिंदी), Marathi, and English with instant payment links.
- **Customer 360 Family Dossiers:** Auto-groups household policies, highlights underinsured families, and flags upcoming endowment maturities.

STRATEGIC VALUE & MARKET FOCUS

From Raw Insurer PDF to Paid UPI Premium in 60 Seconds

A zero-data-entry renewal engine engineered specifically for Indian agency operations.

1. Drag & Drop Portal PDFs

Drop raw insurer due lists (PDF, Excel, CSV). Automated mathematical verification guarantees 100% precision: (Installment × Dues) + GST == Total.

2. Phonetic Contact Bridge

Upload your phonebook (VCF or Google Contacts CSV). Our 2-tier phonetic matcher connects policyholder names with mobile numbers, even with spelling variances.

3. 1-Click WhatsApp Outreach

Dispatch personalized 30-day, 7-day, and Grace Period WhatsApp alerts in Gujarati, Hindi, or English directly through WhatsApp Web with pre-filled text.

4. Branded Household Dossiers

Generate executive consolidated portfolio PDFs featuring your agency's logo and IRDAI license number, perfect for building long-term HNI trust.

OPERATIONAL & ARCHITECTURAL ANALYSIS

Tailored for High-Volume LIC & Multi-Line Broking

Engineered to eliminate the operational pain points of single-line scale and multi-insurer complexity.

High-Volume LIC & Life Advisors

SOLO ADVISORS & MDRT

- **500 to 2,500+ Active Policyholders:** Eliminates paper registers and bulky Excel sheets; handles full monthly renewal cycles with zero extra staff.
- **Sub-Second Tabular LIC Parser:** Extracts policy numbers, installment premium, GST, and agency codes with 100% line-item mathematical reconciliation.
- **Mother-Tongue WhatsApp Alerts:** Reaches policyholders in Gujarati or Hindi, achieving immediate 3x higher payment responses on due dates.
- **Maturity & Claim Advisory Radar:** Automatically alerts advisors ahead of policy maturity dates to reinvest maturity proceeds into new high-ticket policies.

Multi-Line General Insurance Brokers

MULTI-LINE AGENCIES

- **Life, Health, Motor, Marine & Fire:** Centralizes fragmented renewals across LIC, Star Health, HDFC Ergo, ICICI Lombard, Tata AIG, and portal brokers.
- **Multi-Insurer Due List Parsing:** Ingests varied statement formats with automatic insurer detection and column header normalization.
- **Cross-Sell Coverage Radar:** Highlights families with motor insurance but no health cover, unlocking instant 2.5x higher client lifetime value (LTV).
- **Consolidated Household Dossiers:** Delivers single-page family portfolio statements showing all policies across all insurers under one family head.

COMPETITIVE ADVANTAGE & SYSTEM STACK

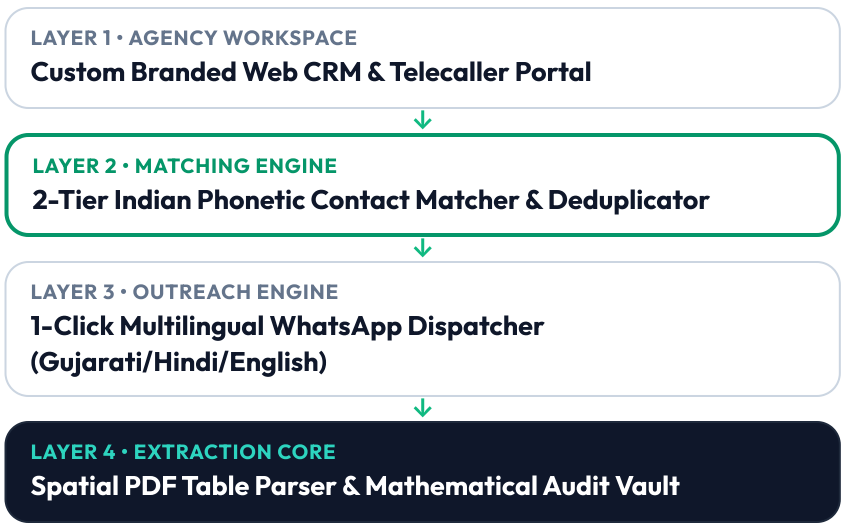

Enterprise Architecture & Priority Founder SLA

Engineered with bank-grade security, mathematical validation, and rapid developer support SLAs.

Deterministic Mathematical Validation
Every extracted policy due row is validated against: (Installment × Dues) + GST == Total Due before database commit, eliminating costly billing or calculation errors.

100% Data Sovereignty & DPDP Compliance
Multi-tenant database isolation ensures agency data ownership. Client policy records and contact books are never shared, sold, pooled, or co-mingled.

Priority Support SLA (<4 Hr Patch Turnaround)
Direct hotline to engineering team during your pilot: P0 upload patches in <4 hours; custom insurer document adjustments delivered in <24 hours.
