

MasterClass for AI in BBA

Navigating the AI Revolution: From Undergraduate Management Student to Future-Ready Business Leader.

Meet Your Instructor

Devendra Vaja

Founder: TenCore Digital Labs

BACKGROUND

24+ years building core systems across firmware, mobile architecture (Android), and tech-driven platforms globally.

PERSPECTIVE

Bridging deep technology architecture with real-world business execution and consumer security dynamics.

GLOBAL SYSTEMS BUILT FOR & COLLABORATED WITH

L&T

EINFOCHIPS

WIPRO

KONAMI

INTEL

CAPGEMINI

EMC

D+H

CHARTBOOST

VUNGLE

RAKUTEN

Why a Technologist is Talking to BBA Students?

- AI isn't written by IT departments alone anymore —it dictates business strategy, ROI, and organizational structure.
- The gap between corporate strategy and technical execution is shrinking rapidly.
- Objective: To give you a pragmatic framework to leverage AI rather than fear it.

The Great AI Reality Check

Addressing your ongoing concerns, hype vs. reality, and what modern companies actually look for.

Key Question: Will AI Take My Future Management Job?

Will AI Take My Future Management Job?

The Myth

"AI will completely replace human managers, financial analysts, and marketers, leaving no roles for fresh BBA graduates."

The Reality

AI replaces routine operational tasks, not strategic judgment, empathy, negotiation, or contextual leadership.

The Opportunity

The job market won't be "Humans vs. AI", but rather "Humans using AI vs. Humans not using AI."

How AI and LLMs are Connected

How AI and LLMs are Connected

An LLM is basically a super-smart AI text predictor. Think of it like autocorrect on steroids, capable of writing entire stories, business reports, or computer code.

How It Works in Three Simple Steps

- **The 'Large' Part (Data):** Read almost the entire internet—millions of books, articles, websites, and conversations.
- **The 'Language' Part (Patterns):** Learns statistical word patterns (knows 'The sky is...' likely leads to 'blue').
- **The 'Model' Part (The App):** Final program you talk to, like ChatGPT or Google Gemini.

The Digital Parrot Analogy

It is like a digital parrot that has memorized every book in the world. It doesn't actually understand things the way you do, but it is incredibly good at guessing the perfect answer to whatever you ask it.

AI Across Core Business Pillars

How Finance, Marketing, Operations, and HR are transforming right now.

HOW AI IS CHANGING THE DAY-TO-DAY WORK IN MAJOR DEPARTMENTS.

AI Across BBA Core Functions

Marketing & Consumer Behavior

Hyper-personalized campaigns, sentiment analysis, predictive customer lifetime value modeling, and automated content pipelines.

Finance & Risk Management

Automated financial forecasting, algorithmic risk assessment, fraud detection, and real-time variance analysis in budgets.

Operations & Supply Chain

Demand sensing, inventory optimization, automated logistics routing, and predictive equipment maintenance.

HR & Talent Management

Resume screening alignment, employee engagement tracking, automated training modules, and workforce productivity insights.

The Managerial Edge

Building ethics, governance, and leadership traits that algorithms cannot replicate.

Ethics, Bias, and Risk Management

Why BBA Leaders Matter Here

- Technologists build systems to scale; business managers must decide if they should scale them.
- Understanding data privacy, algorithmic bias in hiring or loan approvals, and regulatory compliance is a core management responsibility.

The Core Skills to Cultivate

- Critical cross-functional evaluation of tech solutions.
- Managing human-AI collaborative workflows.
- Continuous adaptability and rapid unlearning.

Interactive Exercise: The Prompt Challenge

Goal: Write a welcome message to our masterclass attendees and tell them how to start?

Interactive Exercise: The Prompt Challenge

Key Takeaway: The 3 Parts of a Business Prompt

- **Role / Persona:** Who should the AI act as? (e.g., an expert business consultant, a friendly tutor, a marketing strategist).
- **Context / Background:** What is the situation or background information the AI needs to know?
- **Task / Instruction:** What exact action or output do you want the AI to generate?

The Structured Prompt (Clear & Powerful)

- **[Role]:** Act as an expert copywriter for masterclass attendees.
- **[Context]:** Our masterclass is called "Masterclass for AI in BBA," and our target audience is third year BBA students who want training onboarding instructions.
- **[Task]:** Write a short, friendly welcome email that includes:
 - A catchy subject line.
 - A warm greeting.
 - Three simple steps to complete their profile and start their first workout.

Your 3-Step Action Plan

What you should do starting tomorrow morning as a final year BBA student.

PRACTICAL NEXT STEPS

Your Blueprint to Stand Out

Build a Daily Habit

1

Stop treating AI as a search engine. Use it as a sparring partner to critique your business plans and case studies.

Upskill in Data Literacy

2

You don't need to code in Python, but you must know how to interpret data dashboards and ask the right questions.

Showcase Projects

3

Include AI-assisted business proposals or workflow optimization projects in your portfolio before placement interviews.

YOUR COMPETITIVE EDGE IN THE WORKFORCE

The Future-Proof BBA Graduate

Key Skills to Cultivate

- **Prompt Literacy:** Knowing how to ask the right questions to AI systems.
- **Critical Evaluation:** Validating AI outputs for hallucination and bias.
- **Strategic Synthesis:** Combining AI speed with human empathy and business judgment.

Career Advantage

Graduates who master AI-driven productivity tools deliver 3x output, enabling them to focus on high-level negotiation, leadership, and visionary strategy.

Questions & Answers

Thank you for your energy and engagement!

Let's discuss your future in an AI-powered business world.
