

⚡ CONNECTED STEAM ECOSYSTEM • MULTI TECHNICA

Suprema+ Smart Steam System

A Connected Commercial Platform & Deal Strategy for Multi Technicaa

CLIENT PARTNER

Multi Technicaa (Mr. Kirit B. Parmar)

Thane / Mumbai, Maharashtra

ENGINEERING PARTNER

Devendra Vaja (TenCore Digital Labs)

TenCore Digital Labs

SUBMISSION DATE

August 2026

Version 1.0

Deep Tech Engineering Partner

TenCore Digital Labs • Leadership & Track Record

Devendra Vaja

Founder & Principal Architect,
TenCore Digital Labs

 **Mumbai, Maharashtra, India**

Engineering Experience

24+ years architecting embedded firmware, industrial BLE/wireless ecosystems, and enterprise mobile platforms globally.

Bridging Hardware & Software

Proven expertise connecting industrial equipment control, firmware safety interlocks, and polished consumer mobile UX.

End-to-End Execution

Comprehensive delivery across custom BLE GATT binary protocols, Flutter cross-platform mobile apps, and scalable IoT cloud telemetry.

SECTION OVERVIEW

Executive Summary & Market Opportunity

Why connected smart steam control is becoming the mandatory standard in commercial wellness and hospitality.

Strategic Goal: Capturing ₹15,000–₹20,000 per-unit margin uplift in commercial projects.

The Smart Steam Market Shift

Why commercial gym and resort buyers are moving to connected ecosystems

Global Market Trend

Global leaders (MrSteam SteamLinX, ThermoSol, Helo, TOLO) win premium projects by offering smartphone app control, remote preheat, session presets, and telemetry.

Standard Expectation in Luxury Bids

Multi Technicaa Gap

Multi Technicaa has outstanding hardware reliability (₹25k–₹1.05L) but lacks a smart software tier, leaving high-margin hospitality bids open to international competitors.

Price Pressure from Low-Cost Assemblers

The Suprema+ Advantage

Suprema+ equips Multi Technicaa with a branded smart ecosystem, unlocking 20–30% higher ASP and commanding commercial tender wins with gym chains & resorts.

+₹15,000 to ₹20,000 Margin Uplift

The Suprema+ Solution Overview

End-to-End Hardware + Embedded BLE + Cross-Platform Mobile App

Core System Architecture

- **Industrial Hardware Foundation:** Retains Multi Technicaa's proven heavy-duty boiler base (3 kW to 22.5 kW), upgraded with BLE 5.0 (nRF52840 / ESP32-C3/S3).
- **Native Cross-Platform App:** Flutter iOS & Android with instant local BLE pairing and zero cloud dependency required for core operations.
- **Centralized Multi-Unit Switcher:** Single-pane management for gyms and resorts managing multiple steam rooms and spa zones.

Suprema+ Industrial Steam Bath Generator & Paired Smartphone App

Product Line Impact

- **Commercial Differentiator:** Unlocks premium hospitality, spa, and fitness tenders that mandate smart remote control.
- **Higher ASP & Margin:** Expands per-unit selling price from ₹50,000 to ₹65,000–₹70,000 on 12 kW models.
- **Future-Proof Evolution:** Pre-architected for Bluetooth Mesh multi-panel sync and an optional plug-and-play Wi-Fi Gateway.

Suprema+ Mobile Feature Suite

Designed for effortless one-handed operation in wellness environments

Smart Session Control

Target temperature (35°C–55°C), duration countdown (5–90 min), pre-heat boost, and cool-off cycles with intuitive steppers.

Ambience & Fragrance

Ambience temperature offset, automatic fragranced aroma pump dispensing, and customizable auto-drain scheduling.

Multi-Room Switcher

Gym & spa operators can seamlessly monitor and control 'Men's Steam Room', 'VIP Spa 1', and 'Suite 2' from a single screen.

Safety & Live Telemetry

Real-time telemetry (Heating, Steaming, Draining, Idle), dry-run interlocks, sensor failure warnings, and audible alarm toggle.

SECTION OVERVIEW

Business Case & Unit Economics

Evaluating the return on investment and per-unit hardware cost structure.

The software investment represents a modest fraction of the broader production program.

Business Case & ROI Model

Rapid break-even amortized across commercial shipments

Unit Margin Expansion (12 kW Model)

- **Standard 12 kW Selling Price:** ~₹50,000 per unit.
- **Suprema+ 12 kW Smart Target Price:** ₹65,000 – ₹70,000 per unit.
- **Incremental ASP Uplift:** +₹15,000 to ₹20,000 per unit.
- **Commercial Win Rate:** Enables winning larger commercial projects with higher volume margins.

Amortization & Break-Even

- **Program Investment:** ₹30L – ₹49L (software + embedded engineering).
- **Break-Even Volume:** ~2,000 – 3,000 premium units over 2–3 years.
- **Yearly Trajectory:** At 500–800 units/year, Suprema+ achieves immediate profitability while elevating Multi Technicaa's overall brand equity.

PCB & Electronics Cost per Unit

Estimated BOM cost context vs. one-time software investment

Component / Subsystem	Indicative Unit Cost	Annual at 1,000 Units	Annual at 3,000 Units
BLE 5.0 Module (nRF52840 / ESP32)	₹250 – ₹600	₹2.5 L – ₹6.0 L	₹7.5 L – ₹18.0 L
MCU, Power Supply & Industrial Housing	₹400 – ₹800	₹4.0 L – ₹8.0 L	₹12.0 L – ₹24.0 L
Display, Touch Buttons & Wiring Harness	₹600 – ₹1,500	₹6.0 L – ₹15.0 L	₹18.0 L – ₹45.0 L
PCB Assembly, SMT & Vendor Margin	₹400 – ₹800	₹4.0 L – ₹8.0 L	₹12.0 L – ₹24.0 L
Total Electronics BOM per Unit	₹1,650 – ₹3,700	₹16.5 L – ₹37.0 L	₹49.5 L – ₹1.11 Cr

Key Insight: A ₹45L software investment is a modest fraction of recurring hardware spend and creates permanent, proprietary IP.

Optional Add-On: BLE Protocol Design

Embedded Systems Architecture & Hardware Integration (₹4,00,000)

What is Included in the Add-On

- **GATT Profile Architecture:** Service UUIDs, Characteristic mappings (Control, Telemetry, Safety), Read/Write/Notify definitions, MTU tuning.
- **Binary Frame Specification:** Structured opcode frames, CRC-16 checksums, status response matrices, timeout & retry logic.
- **Safety Interlocks:** Hardware-enforced validation criteria, dry-run safety rules, and emergency ACK cutoff triggers.
- **Firmware Simulator Spec:** Software state machine simulator enabling mobile app development ahead of physical PCB fabrication.

Client Decision Framework

- **Include (+₹4.0L):** TenCore Digital Labs architects and validates the complete BLE communication protocol before Phase 1.
- **Skip (₹0):** Multi Technicaa's electronics team provides documented, finalized BLE GATT specs before app kickoff.
- **Permanent Asset:** Delivers permanent embedded IP 100% owned by Multi Technicaa, reusable across future touchscreens & gateways.

SECTION OVERVIEW

Implementation Roadmap & Milestones

A structured 4-phase engineering program tying cash flow directly to verified deliverables.

30–38 weeks from functional prototype to full commercial deployment.

4-Phase Implementation Roadmap

Clear milestone gating across the 30–38 week timeline

P1

Phase 1: Discovery & Prototype

4–6 Weeks • ₹6,00,000

- › BLE GATT spec review & validation.
- › Flutter prototype app (iOS & Android).
- › Core BLE discovery, pairing & start/stop.
- › Pilot feedback with 2–3 partner gyms/resorts.

Payment: 40% Kickoff | 40% Demo | 20% Sign-Off

P2

Phase 2: MVP Core System

8–10 Weeks • ₹12,00,000

- › Full cross-platform production app.
- › Multi-unit management interface.
- › Diagnostics & fault code state machine.
- › Test bench & hardware bench validation.

Payment: 30% Kickoff | 40% Beta | 30% Sign-Off

P3

Phase 3: Commercial Readiness

8–10 Weeks • ₹15,00,000

- › UI/UX polish & branded onboarding.
- › Maintenance scheduler & descaling alerts.
- › App Store & Google Play compliance.
- › Controlled pilot across 5–10 client sites.

Payment: 30% Kickoff | 40% Release | 30% Final

P4

Phase 4: Scale & Wi-Fi Gateway

10–12 Weeks • ₹12,00,000

- › IoT Wi-Fi gateway hardware bridge.
- › Remote scheduling & out-of-building preheat.
- › Multi-site cloud administrative dashboard.
- › Fleet telemetry & usage analytics.

Payment: 30% Kickoff | 40% Build | 30% Acceptance

Phase 1 & Phase 2 Deep Dive

From working prototype to production MVP core

Phase 1: Discovery & Prototype (₹6.0L / ₹10.0L)

- **Tranche 1 (40% Kickoff):** ₹2,40,000 *(or ₹4,00,000 with Protocol Add-On)* — Architecture sign-off & sprint launch.
- **Tranche 2 (40% Demo):** ₹2,40,000 *(or ₹4,00,000 with Protocol Add-On)* — Working prototype app with live hardware demo.
- **Tranche 3 (20% Pilot Sign-Off):** ₹1,20,000 *(or ₹2,00,000 with Protocol Add-On)* — Pilot feedback report & Phase 2 Go/No-Go decision.
- **Deliverable:** Validated functional prototype app controlling physical steam generator.

Phase 2: MVP Core System (₹12.0L)

- **Tranche 1 (30% Kickoff):** ₹3,60,000 — Production sprint initiation.
- **Tranche 2 (40% Beta Build):** ₹4,80,000 — Feature-complete beta app with integrated production BLE stack.
- **Tranche 3 (30% MVP Sign-Off):** ₹3,60,000 — Initial field testing & MVP acceptance sign-off.
- **Deliverable:** Commercial-grade core app ready for early customer installations.

Phase 3 & Phase 4 Deep Dive

Commercial market rollout and scalable cloud gateway

Phase 3: Commercial Readiness (₹15.0L)

- **Tranche 1 (30% Kickoff):** ₹4,50,000 — Commercial UX polish & asset preparation.
- **Tranche 2 (40% Release Candidate):** ₹6,00,000 — Feature-complete build + App Store packages.
- **Tranche 3 (30% Final Acceptance):** ₹4,50,000 — 5–10 site pilot validation & performance sign-off.
- **Deliverable:** Market-ready Suprema+ system deployed in commercial live environments.

Phase 4: Scale & Wi-Fi Gateway (₹12.0L)

- **Tranche 1 (30% Kickoff):** ₹3,60,000 — Wi-Fi IoT gateway architecture & cloud backend.
- **Tranche 2 (40% Gateway Integration):** ₹4,80,000 — Remote scheduling, cloud portal & telemetry.
- **Tranche 3 (30% Final Cloud Sign-Off):** ₹3,60,000 — Field deployment & enterprise fleet sign-off.
- **Deliverable:** Full smart ecosystem competing with MrSteam & ThermaSol.

SECTION OVERVIEW

Strategic Deal Structures & Commercial Options

Flexible financial engagement models tailored to Multi Technicaa's budget and commercial strategy.

Choose between Fixed Fee, Per-Unit Royalty, or Joint Margin Share.

Commercial Deal Structures

Three tailored options aligned to your business strategy

Option 1: Fixed Fee

FIXED BUDGET

Predictable Cost & 100% Ownership

₹45,00,000

₹45 Lakhs (or ₹49L with Protocol)

- ✓ Milestone-based tranches across 4 phases
- ✓ Zero ongoing royalties or licensing fees
- ✓ 100% proprietary software ownership
- ✓ Predictable budgeting with no revenue sharing

"Clear, fixed total of ₹45L in small tranches. No royalties, no surprises."

Option 2: Unit Royalty

SHARED RISK

Lower Upfront + Per-Unit Royalty

₹30,00,000

Upfront + ₹750 per Unit (Cap: ₹15L)

- ✓ Reduced upfront cash outlay across Phases 1–3
- ✓ ₹750 royalty per Suprema+ unit sold
- ✓ Strict cap at 2,000 units (Max Royalty: ₹15L)
- ✓ Max Total capped at ₹45L — Shared Sales Risk

"Pay ₹30L during development, and ₹750 per unit only as Suprema+ sells."

Option 3: Joint Product

STRATEGIC PARTNER

Margin / Price Uplift Share

₹30,00,000

Upfront + 15% Uplift (Cap: ₹15L)

- ✓ Co-engineered flagship product model
- ✓ 15% share of ₹18k price uplift (₹2,700/unit)
- ✓ Strict cap at ₹15L (~5,556 units / 3 years)
- ✓ Max Total capped at ₹45L — Aligned Value Creation

"We share in the extra profit margin we create together, capped at ₹15L."

Deal Comparison & Decision Matrix

Side-by-side evaluation across key commercial dimensions

Evaluation Dimension	Option 1: Fixed Fee	Option 2: Unit Royalty	Option 3: Joint Product
Upfront Cash Commitment	₹45.0 L (or ₹49.0 L)	₹30.0 L (or ₹34.0 L)	₹30.0 L (or ₹34.0 L)
Ongoing Variable Payment	None (₹0)	₹750 per unit sold	15% of price uplift (₹2,700/unit)
Total Cost Ceiling	₹45.0 Lakhs	₹45.0 Lakhs (Capped)	₹45.0 Lakhs (Capped)
Cash-Flow Risk Profile	Client retains risk	Shared across unit sales	Shared across profit creation
Vendor Alignment	Fixed Scope Delivery	High (Volume aligned)	Highest (Margin & pricing aligned)
Optimal Fit For...	Fixed corporate CAPEX	Cash-conscious scaling	Strategic long-term partnership

Recommendation: All 3 models preserve the same ₹45L maximum ceiling while offering flexible upfront cash flow.

Pricing Summary & Store Logistics

Scenario breakdown with and without BLE protocol consulting

Summary Pricing Matrix

- **Scenario 1 (App Only - Client Provides Protocol):**
 - Option 1 (Fixed): ₹45,00,000
 - Option 2 (Royalty): ₹30L Upfront + ₹750/unit (Max ₹45L)
 - Option 3 (Joint): ₹30L Upfront + 15% Uplift (Max ₹45L)
- **Scenario 2 (Full Solution w/ Protocol Consulting):**
 - Option 1 (Fixed): ₹49,00,000
 - Option 2 (Royalty): ₹34L Upfront + ₹750/unit (Max ₹49L)
 - Option 3 (Joint): ₹34L Upfront + 15% Uplift (Max ₹49L)

Store & Distribution Logistics

- **Google Play Developer Account:** \$25 one-time registration fee (~₹2,100).
- **Apple Developer Organization Program:** \$99 / year (~₹8,400/year).
- **Enterprise Sideload (B2B):** Direct Android APK distribution for gym facility engineers without mandatory Play Store listing; Apple TestFlight/Business Manager for iOS enterprise pilots.

Strategic Next Steps & Phase 1 Kickoff

Immediate roadmap to launch the Suprema+ engineering program

1. Hardware Team Review

Review proposal with electronics team; decide whether to include BLE Protocol Design Add-On (₹4.0L) or provide existing GATT spec.

2. Select Deal Model

Confirm preferred financial model: Option 1 (Fixed Fee), Option 2 (Per-Unit Royalty), or Option 3 (Joint Product).

3. Approve Phase 1 Kickoff

Execute Phase 1 Statement of Work (₹6.0L or ₹10.0L) with the initial 40% kickoff tranche.

4. Sprint 1 Execution

Conduct technical alignment workshop and initiate prototype Flutter mobile app development.
