

SemiconMart

The background is a composite image with a dark blue and purple color scheme. It features a large, circular semiconductor wafer on the left, a robotic arm in the center, a white truck on the right, and glowing blue and purple light trails that sweep across the upper right. The ground is covered in a circuit board pattern.

SEMICONMART TECHNOLOGY PVT LTD

ABOUT US

SemiconMart Technology Pvt. Ltd. is a technology-enabled procurement and supply-chain platform built specifically for India's growing semiconductor ecosystem. We connect semiconductor FABs, ATMPs/OSATs, EMS companies, equipment providers and R&D institutions with specialized consumables, maintenance products and critical supplies through a centralized sourcing ecosystem.

What Defines SemiconMart

- Semiconductor-Focused
- Centralized Procurement
- Smart Inventory & Fulfilment
- Supply-Chain Intelligence
- Scalable Infrastructure Vision

"Powering the ecosystem that powers semiconductors."

PROBLEM STATEMENT

SEMICONDUCTOR GROWTH,
SUPPLY CHAINS STILL
FRAGMENTED

01

FRAGMENTED SUPPLIER ECOSYSTEM

Multiple vendors, inconsistent quality and no centralized semiconductor-focused sourcing make procurement complex.

02

HEAVY IMPORT DEPENDENCE

Long international lead times, customs delays and expensive emergency sourcing create uncertainty.

03

LIMITED LOCAL INVENTORY

Critical consumables and spare parts are often not stocked locally, forcing FABs and ATMPs to carry higher inventory.

04

HIGH DOWNTIME RISK

Delayed availability of critical consumables can disrupt production, making supply reliability mission-critical.

05

LACK OF SPECIALIZED PROCUREMENT

Generic industrial sourcing platforms lack semiconductor-grade specifications, real-time inventory visibility and industry-specific procurement capabilities.

OUR INNOVATIVE SOLUTIONS

CENTRALIZED SEMICONDUCTOR PROCUREMENT

One platform for consumables sourcing, spare parts procurement, approved vendors and technical product discovery.

SMART LOCAL INVENTORY

Local stocking and multi-city warehouse infrastructure designed to improve product availability and reduce inventory burden.

RAPID FULFILMENT

A streamlined sourcing and logistics network targeting 24–72 hour delivery for critical semiconductor requirements.

SUPPLY-CHAIN INTELLIGENCE

Real-time availability, lead-time visibility, procurement analytics and demand forecasting for smarter purchasing decisions.

DIGITAL PROCUREMENT INFRASTRUCTURE

Vendor access, RFQ management, procurement dashboards, inventory visibility and ERP integration capabilities create an end-to-end digital ecosystem.

DISCOVER OUR PRODUCTS

CLEANROOM CONSUMABLES

Gloves • Wipes • Garments •
Masks • Sticky Mats

FAB MAINTENANCE

O-Rings • Vacuum Components •
Filters • Tubings • Fittings

ATMP & ELECTRONICS CONSUMABLES

SMT Consumables • Packaging
Materials • Adhesives •
Inspection Materials

ESD & SAFETY PRODUCTS

ESD Packaging • Wrist Straps •
Flooring • Storage Systems

CHEMICAL & PROCESS CONSUMABLES

CMP Consumables • Specialty
Chemicals • Process Filters •
Quartz Ware

FUTURE EXPANSION

Make in India Products • Spare
Parts Exchange • Refurbished Parts
Marketplace • Vendor-Managed
Inventory (VMI) • Predictive
Procurement Systems

DISCOVER OUR SERVICES

**SEMICONDUCTOR
CONSUMABLES SOURCING**

Specialized sourcing of cleanroom, ESD, process, maintenance and electronics consumables.

**SMART WAREHOUSING
& FULFILMENT**

Local inventory, multi-location warehousing and rapid 24-72 hour fulfilment capabilities.

**PROCUREMENT
INTELLIGENCE**

Inventory visibility, lead-time tracking, demand forecasting and procurement analytics for smarter decisions.

**SPARE PARTS
PROCUREMENT**

Reliable sourcing support for critical FAB, ATMP and semiconductor equipment spare parts.

**VENDOR-MANAGED
INVENTORY (VMI)**

On-site inventory support and replenishment solutions to reduce procurement and inventory burden.

**SUPPLIER & RFQ
MANAGEMENT**

Verified supplier ecosystem, centralized RFQ management and streamlined vendor coordination.

SIZE OF MARKET

Indicative calculation using ~₹83/\$ and planning assumptions for SAM/SOM. The uploaded deck supports the \$100B+ TAM, but does not provide standalone SAM/SOM values

TOTAL ADDRESSABLE MARKET (TAM)

₹8.3+ LAKH CRORE

SERVICEABLE ADDRESSABLE MARKET (SAM)

₹83,000+ CRORE

SERVICEABLE OBTAINABLE MARKET (SOM):

₹830+ CRORE

COMPETITIVE ADVANTAGES

Parameter	SemiconMart Advantage
Industry Focus	Semiconductor-specific procurement ecosystem
Procurement	Centralized multi-vendor sourcing
Inventory	Real-time inventory visibility
Fulfilment	Targeted 24–72 hour delivery
Warehousing	Local, multi-city inventory strategy
Supplier Network	Verified semiconductor supplier ecosystem
VMI	Vendor-managed inventory support
Technology	ERP integration & procurement analytics
Intelligence	Demand forecasting & predictive procurement

SCALE-UP PLAN

ESTABLISH RELIABILITY | 0–12 MONTHS

Build a dependable inventory model, strengthen rapid fulfilment capabilities and develop key semiconductor industry partnerships.

EXPAND SUPPLY & REACH | 12–24 MONTHS

Scale through a hybrid marketplace, expand into multiple cities and widen the semiconductor consumables and spare-parts portfolio.

DEEPEN TECHNOLOGY INTEGRATION | 18–30 MONTHS

Introduce SaaS procurement tools, VMI services, ERP integration and predictive inventory systems for smarter supply-chain management.

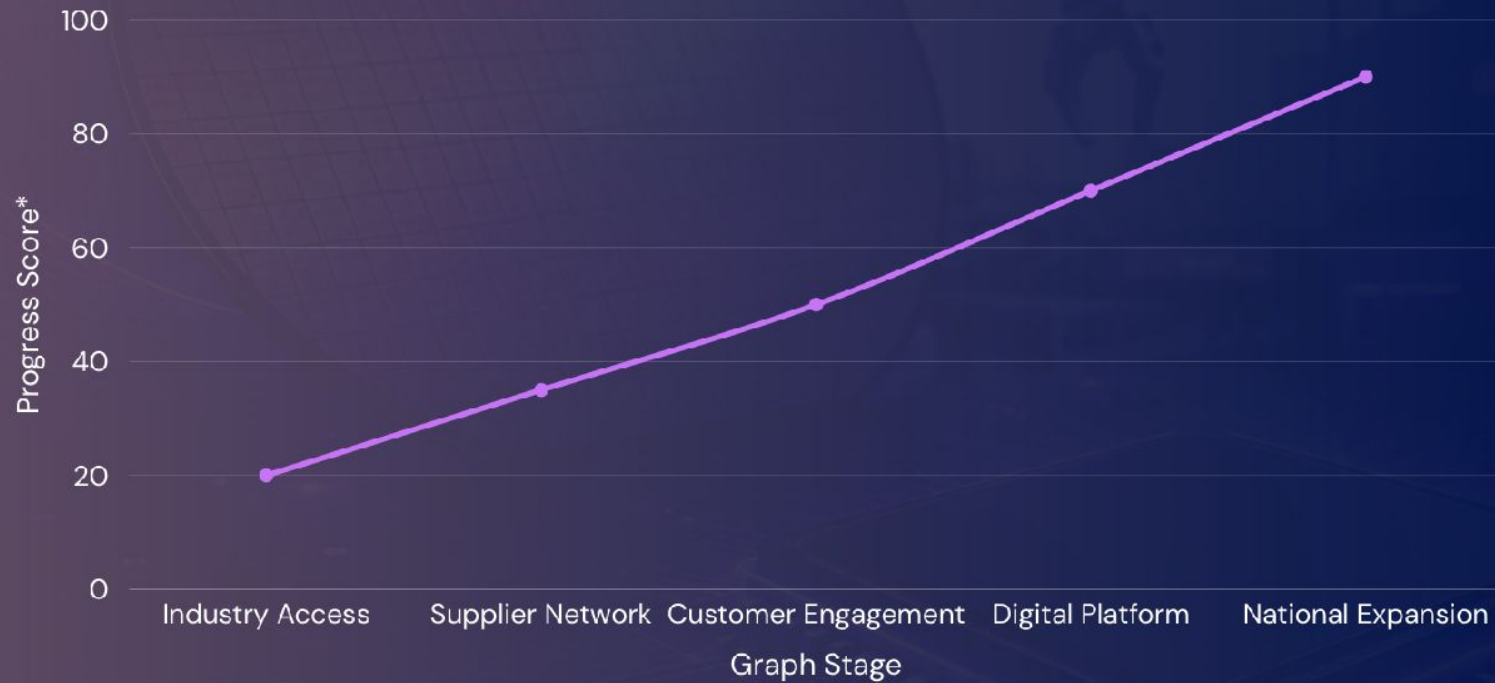

BECOME SEMICONDUCTOR INFRASTRUCTURE | 36+ MONTHS

Enable local manufacturing, strengthen Make-in-India sourcing and develop a broader semiconductor supply-chain financing and infrastructure ecosystem.

TRACTION

Building the ecosystem, partnerships and technology foundation required to scale as India's specialized semiconductor procurement platform.

PLATFORM FEATURES

REAL-TIME INVENTORY VISIBILITY

Check product availability across the procurement ecosystem before placing orders.

SMART PRODUCT DISCOVERY

Product listing, filtering and semiconductor-grade specifications simplify technical sourcing.

DIGITAL PROCUREMENT DASHBOARD

Centralized procurement dashboard with RFQ management and vendor access.

VERIFIED SUPPLIER NETWORK

Supplier verification helps build a reliable ecosystem of semiconductor-focused vendors.

SMART WAREHOUSING

Multi-location fulfilment and warehouses in key industrial hubs support faster availability.

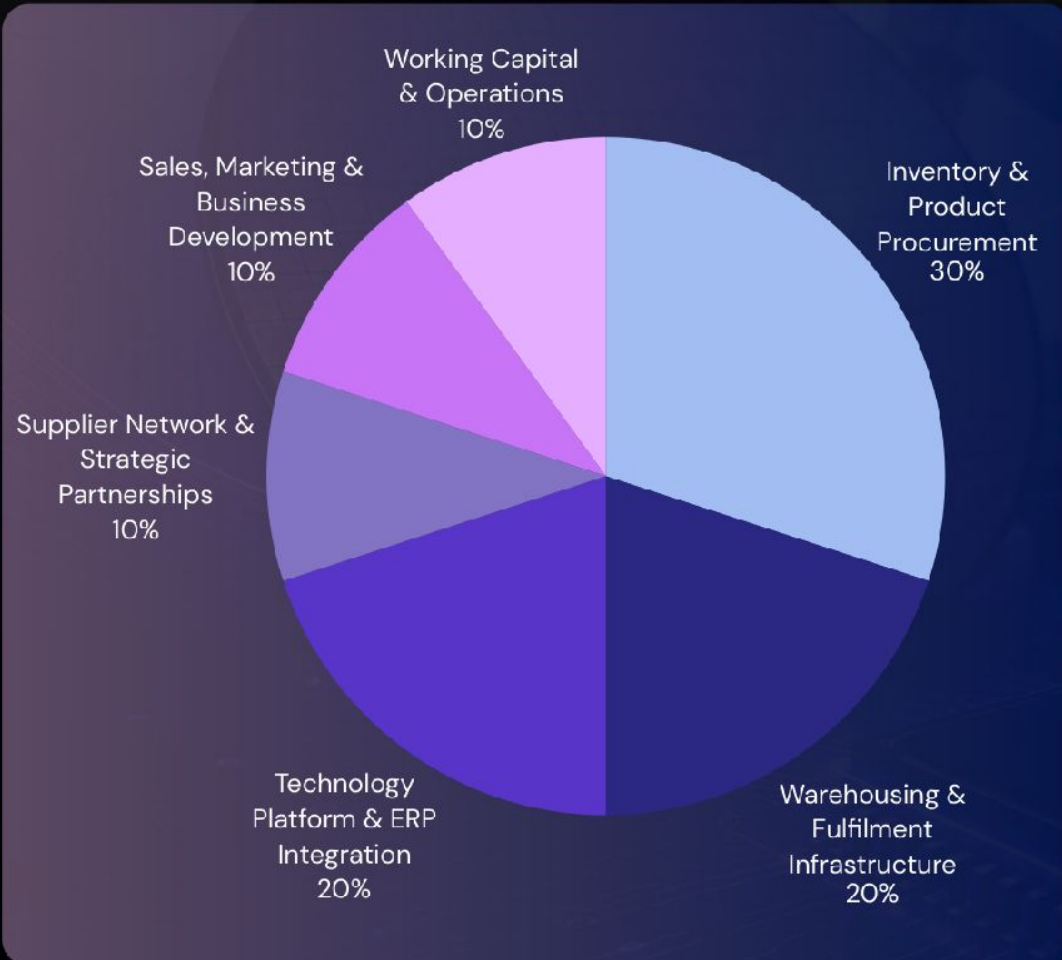

RAPID & TRACKABLE DELIVERY

Targeted 24–72 hour delivery, supported by live order tracking and fulfilment visibility.

ERP INTEGRATION CAPABILITY

Designed for integration with enterprise procurement and inventory management systems.

USE OF FUNDS

Fund Utilization	Allocation
Inventory & Product Procurement	30%
Warehousing & Fulfilment Infrastructure	20%
Technology Platform & ERP Integration	20%
Supplier Network & Strategic Partnerships	10%
Sales, Marketing & Business Development	10%
Working Capital & Operations	10%

MEET THE TEAM

MANDEEP JASS

Founder & Director

A. Shankar brings 20+ years of semiconductor industry experience, with expertise spanning global supply chains, strategic sourcing and business development.

His industry knowledge and network provide SemiconMart with strong domain leadership to build a specialized semiconductor procurement ecosystem.

NIHAL SINGH

Co-Founder & Director

K. Suresh brings 15+ years of experience in procurement, operations and supply-chain management, strengthening SemiconMart's ability to build efficient sourcing, inventory and fulfilment operations at scale.

SemiconMart

THANK YOU
