Hi Bhavesh,

Great meeting you at the **BLL SprintConnect** on 8th August in Andheri West. I thoroughly enjoyed hearing how your father built **Vinay Graphics** into a trusted, full-fledged printing solutions business, and I appreciate your vision to take it to the next digital level.

Following our conversation, I put together this practical digital strategy. Instead of just speaking in abstracts, we have already built live concept mockups so you can see exactly what the user journey looks like. Our focus is to turn online searches in your territory into actual business leads.

Below, you will find our comparison of the digital opportunities, the concepts we've developed for you, and a breakdown of our implementation packages. I look forward to your thoughts.

01 / OPPORTUNITY & CONCEPT MOCKUPS

THE OPPORTUNITY TODAY

Currently, **vinaygraphics.in** points to a static "Coming Soon" page. Meanwhile, local printing competitors are capturing daily search intent. A to Z Digital Prints has 1,300+ reviews and a direct-to-WhatsApp pipeline. Just Print lists individual services separately to dominate specific print-type keywords. Right now, a customer searching for "Vinay Graphics" or printing solutions in your area has very few pathways to engage.

Vinay Graphics (Current)

INACTIVE

Website is offline (Coming Soon page). High risk of word-of-mouth clients getting distracted by competitor listings when searching for contact details online.

Local Competitors

CAPTURING MARKET

Leveraging active websites with individual service SEO and immediate WhatsApp click-to-chat triggers to close local print jobs instantly.

WHAT WE HAVE BUILT (CONCEPTS)

To demonstrate the shift, we have designed two custom digital concepts tailored specifically for Vinay Graphics. Click the buttons below to preview the active web layouts.

1. One-Page Website Concept

MOCKUP

A clean, professional landing page showcasing your capabilities by category (Stationery, Events, Cards), telling your brand history, listing key services, and prompting visitors with a WhatsApp chat button.

2. WhatsApp Order Bot

MOCKUP

A conversational funnel where customers select products, answer 2–3 specific questions, receive automatic quotes, and track their order states (Received → Design → Production → Ready) without downloading any app.

02 / IMPLEMENTATION PLANS & NEXT STEPS
